

RE: 2023 OPERATING AND CAPITAL BUDGET

Background:

An annual budget must be adopted prior to the end of the current fiscal year. Staff has prepared the 2023 Operating and Capital Budget for adoption in keeping with these requirements.

Analysis:

A summary of the 2023 Operating and Capital Budget, a detailed account of revenues and appropriations, and a budget message can be found attached to this Council Bill. Overall, this budget reflects an estimated beginning cash balance of \$45,611,801; revenues totaling \$47,247,896; and expenses totaling \$62,039,848. The Revenue over Expense total for this budget is \$(14,791,952). Restricted Reserves total \$12,136,303 which leaves an unrestricted cash balance for the total Government, all funds of \$18,683,547.

The proposed budget presented for the first reading at the November 28, 2022 meeting included a transfer out of the General Fund and a transfer into the Street Fund in the amount of \$272,935. This is the ½-cent portion of the Use Tax. This transfer was removed in the final version of the budget per Council's instruction. The net effect on the total budget, all funds, remains unchanged.

Recommendation:

Staff recommends passage of this Bill as presented.

Budget Process

Although Missouri State Statutes only require that General fund and Special Revenue funds be annually appropriated, according to Part I, Article VIII, Section 8.3 of the City of Nixa's Home Rule Charter, all City funds are budgeted. Budgets are viewed as a management control tool and a financial plan to monitor and measure expenditure levels. Budgeting of the enterprise activity is necessary to ensure the level of user rates is sufficient to cover costs and meet bondholder requirements for debt coverage.

The annual budget is adopted before the beginning of the fiscal year. After the budget is established, Council may make any budgetary amendments by Ordinance. The City Council sets the parameters for the annual budget process, including priority of services, balancing the budget and internal controls.

Basis of Budgeting

The City of Nixa uses a “cash basis” of budgeting for all fund types. This means that the city budget is based on expected cash receipts and disbursements. Encumbrances and depreciation are not budgeted. The City’s total proposed expenditures may not exceed the estimated revenues to be received plus any unencumbered cash reserves estimated to be on hand at the beginning of the budget year. In the case of an emergency or a contingency, which was not reasonably foreseeable, a budget amendment would be required.

The City’s budget represents a financial plan for the fiscal year setting forth all estimated expenditures, revenues, and other financing sources for the ensuing budget year, together with the corresponding figures for the previous fiscal year. In estimating the anticipated revenues, consideration must be given to any unexpected surpluses and the historical data of sales tax receipts. Further, the budget must show a balanced relationship between the total proposed expenditures and the total anticipated revenues with the inclusion of beginning funds.

Basis of Accounting

All governmental fund types use the modified accrual basis of accounting. Under the modified accrual basis of accounting, revenues are recognized when susceptible to accrual (i.e., when they become both measurable and available). “Measurable” means the amount of the transaction can be determined and “available” means collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period. Expenditures are recorded when the related fund liability is incurred. Principal and interest on general long-term debt are recorded as fund liabilities when due. Those revenues susceptible to accrual are sales and use taxes, Missouri County Aid Road Trust (CART) funds, and franchise tax.

Proprietary fund types utilize the accrual basis of accounting. Under this method, revenues are recorded when earned and expenses are recorded at the time liabilities are incurred.

Bridging the Basis of Budgeting and Accounting

Some of the differences between the cash basis of budgeting and the accrual method of accounting are:

Debt payment for principal – budgeted as an expense item, adjusted at year-end against the liability.

Depreciation - recorded for proprietary funds on an accrual basis, eliminated for budget purposes.

Encumbrances – recorded as a reserve of fund balance on the modified accrual basis, on a cash basis for budgeting recorded as a reserve of budgeted funds.

Compensated Absences – adjusted annually using the accrual method, not budgeted but absorbed by turnover and usage.

Tax revenue accruals – even though tax revenues are accrued when they become collectible, it will translate to twelve months of tax revenue matching twelve months of budgeted revenue.
