

## **Memorandum Regarding Council Bill No. 2023-45: An Ordinance adopting a consolidated fee ordinance.**

### **Background:**

The City of Nixa, like almost all other cities in Missouri, charge user fees for the services, licenses, and approvals provided by the City. User fees are charged so that the general taxpayer is not completely subsidizing the provision of services or approvals provided to individuals. The City's fees are currently scattered throughout the City Code and several un-codified ordinances.

### **Analysis:**

The intent of this Council Bill is to place the City's user fees into one section of the City Code. This will place the City's fees on a firm enforceable foundation and provide the fees in a more convenient location. Currently, to determine the amount and legal authority for a currently imposed City fee, the public or staff are required to search the City Code for the fee or know that the fee was approved by an uncodified ordinance. This is unwieldy and inefficient.

Additionally, the Bill updates the language of a few sections of the City Code to update the provisions to reflect current practices related to specific fees.

### **Recommendation:**

Staff recommends approval of this Bill. The updates made to the City Code by the Bill will provide the City's fees with an added element of efficiency and formality.

415 (e)

416  
417 (1) As used herein, the term "Stage II Emergency" means that it shall be unlawful for  
418 water to be used from the water distribution system for the watering of grasses,  
419 lawns, gardens, trees, shrubs, or similar vegetation; to wash any building,  
420 sidewalks, driveways or any outdoor structure; to fill or refill any pools, hot tubs,  
421 tanks or other vessels not used for direct public health and welfare. It shall be  
422 unlawful to wash motor vehicles of any type, trailers of any type, and other  
423 automotive or boating equipment by any means except at a car wash that has,  
424 prior to the declaration of the state of emergency, been issued a business license  
425 by the city for that purpose; or to draw water from the city water system from any  
426 faucet or outlet when such water is not being used for ordinary and usual domestic,  
427 commercial, or industrial purpose.

428  
429 (2) Water rates for  $\frac{5}{8} \times \frac{3}{4}$  residential service connections during a Stage II emergency  
430 will be adjusted. All water used in excess of 15,000 but less than 25,000 will be  
431 charged at a rate 25 percent higher than the Stage I rate per 1,000 gallons. All  
432 water used in excess of 25,000 will be charged at a rate 50 percent higher than  
433 the Stage I rate per 1,000 gallons.

434  
435 (3) Bulk water rates during a Stage II Emergency will be charged at a rate 50 percent  
436 higher than the Stage I rate for bulk water per 1,000 gallons.

437  
438 (f)

439  
440 (1) As used herein, the term "Stage III Emergency" means that conditions on the  
441 distribution system are critical and all efforts are for securing the water supply for  
442 the health and welfare of the citizens. During a Stage III emergency, it shall be  
443 unlawful to use water in any manner for the watering of grasses, lawns, gardens,  
444 trees, shrubs, or similar vegetation under any conditions or by any means; or to  
445 wash any motor vehicle, trailer, or other automotive or boating equipment; or to  
446 wash any building, sidewalks, driveways or any outdoor structure under any  
447 conditions or by any means, including at a commercial car wash, or to fill or refill  
448 any pools, hot tubs, tanks or other vessels not used for direct public health and  
449 welfare.

450  
451 (2) Water rates for  $\frac{5}{8} \times \frac{3}{4}$  residential service connections during a Stage III Emergency  
452 will be adjusted. All water used in excess of 15,000 but less than 25,000 will be  
453 charged at a rate 25 percent higher than the Stage II rate per 1,000 gallons. All  
454 water used in excess of 25,000 will be charged at a rate 50 percent higher than  
455 the Stage II rate per 1,000 gallons.

456

457 (3) Violations for a Stage III Emergency may result in the loss of service. During a  
458 Stage III Emergency, the city may curtail service by removing the water meter and  
459 capping the service until outstanding accounts have been satisfied per subsection  
460 (h) (4) of this section. Further violation may result in the loss of service until the  
461 state of emergency is reduced to Stage I.  
462

463 (4) During a Stage III Emergency, no bulk water service is available. A bulk service  
464 customer who uses water during a Stage III Emergency shall be charged a rate of  
465 100 percent higher than the Stage II rate per 1,000 gallons and the loss of service  
466 until the Emergency level has been removed. Further use shall be considered theft.  
467

468 (g) At the next regular or special meeting of the city council following the declaration of  
469 an emergency of either stage by the city administrator, the city council shall review the  
470 findings of fact and declaration of the city administrator. After making such review, the  
471 council shall either confirm the actions of the city administrator, reduce the stage of  
472 emergency or overturn the declaration in its entirety; provided, however, that no action  
473 of the council to reduce the stage of emergency declared by the city administrator or  
474 to overturn a declaration of emergency shall be effective unless such action is  
475 approved by the majority vote of all the members of the council then-elected or  
476 appointed and serving on the council. Further, no action of the council in reducing the  
477 stage of emergency or overturning the action of the city administrator in declaring an  
478 emergency shall be a defense to a charge of violating the provisions of this section for  
479 acts which occurred after the declaration became effective, but prior to its modification  
480 or reversal by the city council.  
481

482 (h) The following additional provisions shall be applicable to the provisions of this section:  
483

484 (1) A declaration of emergency made under this section shall continue in full force and  
485 effect unless and until the stage of the declaration is increased or reduced (in which  
486 event, the prior declaration shall be superseded as of the date and time of the entry  
487 of the new declaration), or released by written order of the city administrator or  
488 reduced or reversed by action of the city council.  
489

490 (2) In declaring a state of emergency, the city administrator may, if circumstances  
491 justify, make the declaration applicable only for specified hours of the day or for  
492 certain specified days.  
493

494 (3) No culpable mental state shall be required for a person charged with the violation  
495 of the provisions of this section to be found guilty of such violation. The owner or  
496 occupant of the premises upon which such illegal use shall occur shall also be  
497 deemed guilty of a violation occurring upon any such premises, regardless of the  
498 person who shall have committed such illegal use. The preceding sentence shall  
499 not be construed as relieving the person actually making such illegal use from  
500 responsibility therefor.  
501

502 (4) The water service of any person found guilty of knowingly violating the provisions  
 503 of this section may be disconnected from the water distribution system, and, if so  
 504 disconnected, shall not be reconnected until he shall have paid all costs of water  
 505 used and a disconnection/reconnection fee in the amount established by ordinance  
 506 ~~which shall be placed in the city water fund~~ Section 2-151 of the Nixa City Code.  
 507

508 (i) *Guidelines and examples for emergency declaration considerations.* Because of  
 509 continually varying conditions on the water distribution system, weather and other  
 510 environmental factors, any one or combination of occurrences may be considered as  
 511 benchmarks for the city administrator in making an emergency declaration. Some  
 512 examples include:  
 513

514 (1) Water level in a well or wells that is reduced to within 50 feet above the top of the  
 515 pump.  
 516

517 (2) Water usage in excess of pumping capacity for sustained periods beyond normal  
 518 operations.  
 519

520 (3) Storage capacity in one or more towers being reduced during peak periods below  
 521 minimum levels for sustained periods.  
 522

523 (4) System component failure, such as a well pump failure, large water leak or large  
 524 fire combined with any of subsections (i)(1)—(3) of this section or during peak  
 525 usage times that could cause any of the above factors to occur.  
 526

527 (j) *City facilities and operations.* During a declared water system emergency, all city  
 528 departments and facilities shall reduce certain operations that may contribute to  
 529 further escalation of the emergency. During declared periods, all departments shall:  
 530

531 (1) Reduce all outdoor watering to the level implemented for other users. During a  
 532 stage I emergency, reduce outdoor watering to only recreational fields, shrubs,  
 533 flowerbeds and trees.  
 534

535 (2) During stage II and III emergency, stop all outdoor watering. Cease all nonessential  
 536 outdoor watering of grass areas in yards and open spaces.  
 537

538 (3) During all stages, cease all vehicle and equipment and other washing except  
 539 where necessary for operations.  
 540

541 (4) During stage I emergency, reduce hydrant or system flushing to only essential  
 542 operations necessary to maintain the health, safety and welfare of the citizens.  
 543 Increase discretion with increased stages.

561 Section 2-151 of the Nixa City Code shall be added to all bills for water service which  
562 are not paid by the stated due date. If a bill for water service is not paid by the tenth

586 separate meters shall not be added or cumulated for billing purposes, irrespective of  
587 the location of the meters except only when such separate meters are installed on the  
588 same premises for the convenience and at the request of city, in which event the water  
589 service furnished through said meters may be cumulated for billing purposes.

590

591 (f) In case of a dispute involving the accuracy of a water meter, such meter may be tested  
592 upon the request of the water user and the bill will be adjusted if the testing reveals a  
593 discrepancy. If upon testing, the meter is found to be accurate, the requesting water

595 may place this on the user’s next bill.

596
