

Memorandum Regarding Council Bill No. 2024-04: An Ordinance declaring the necessity of acquiring by condemnation certain property.

Background:

On January 19, 2022, by Ordinance No. 2237, the City Council approved the preliminary plat for the Riverton Park Subdivision. Part of the public improvements for this Subdivision was the installation of a box culvert under North Road and the dedication of a drainage easement downstream of the culvert. The purpose of the drainage easement is to provide for stormwater and erosion control improvements to mitigate the erosion of the roadbed of North Road. The City is currently involved in litigation (Case No. 22CT-CC00166) in which the Plaintiff seeks to have the drainage easement declared void.

To avoid litigation on this matter, City staff have attempted to negotiate with the Plaintiff property owner to voluntarily acquire the easement. Without the easement, the City is unable to maintain stormwater and erosion control improvements. Without these improvements, the roadbed of North Road is subject to increased erosion which undermines the structural integrity of the road and creates the potential for a public safety issue for vehicles travelling on North Road.

The City has made offers to purchase the easement, based on an appraisal. As of the date of this memorandum, the City's offer has not been accepted.

Analysis:

Council Bill 2024-04, if approved, would allow the City to proceed with filing a condemnation action to acquire the easement and make the required improvements.

Recommendation:

Staff recommends approval of this Council Bill.
